WELCOME TO A REVOLUTION IN AFFORDABLE LIVING

We welcome you to experience the **Aura** of a well designed affordable luxury. This is a revolution in affordable luxury apartments. A revolution in the way we think about homes.

At Aura, every single experience has been deeply thought about. Be it our layout, our apartment design or our world class amenities - You will find that every experience is designed to entice you.

This is a result of an incredibly clear design philosophy - **more for less.**

AURA

an artistic impression of tranquillo aura elevation view

GREEN BUILDING CONCEPT MAXIMISING THE NATURAL 'AURA'

The primary aim of AURA is to create a living space with a secure, luxurious, and comfortable environment to revive the awareness of the prevailing green building movement in India. The integration of the Green concept in the design and construction aids in the comfort of the occupants. Furthermore, it reduces the negative impact of the development on the environment. We have attempted the IGBC Green Affordable Housing Rating system targeting platinum rating.

Features

- Universal friendly Design (Differently able persons)
- Vast vegetation with maximum native species
- 100% of Rain Water is harvested and recharged within the site
- Water conservation - High Efficient water flush and flow fixtures
- 100% Waste Water generated is treated and reused
- 0% water discharged from site
- Efficient building Envelope for better Indoor thermal comfort
- High Efficient lighting design
- On-site renewable energy – Caters to 50% of annual Energy of common area lighting
- 100% Use of local materials and most of the building materials are with recycle content
- Increased ventilation, Ample natural daylight & Cross ventilation design
- Usage of Low VOC (Volatile Organic Compound) Paints, adhesives and coatings
- Green Certified Products and Materials

RAIN WATER HARVESTING

Project is designed to capture 100% of rainwater and to Enhance ground water table and reduce the dependency on municipal water

ENERGY REDUCTION BY EFFICIENT BUILDING ENVELOPE DESIGN

MAXIMUM VENTILATION, AND CROSS BREEZE

BASIC AMENITIES

Location of the project, reduces the negative impacts caused to the environmental from automobile with all the basic house hold amenities

LOW VOC PAINTS & ADHESIVES

RENEWABLE ENERGY

WATER CONSERVATION

Water Conserving Plumbing Fixtures, will be installed including low-flow toilets, Showerheads, and Efficient faucets. These fixtures reduces the water consumption by at least 25% from the Baseline Standards

Water efficient landscaping design to conserve water usage within the project site, by limiting the Turf area and design maximise space with native and adaptive plants

WATER MANAGEMENT

Centralised Waste Collection Area and Segregation of waste (Dry and Wet) at the Flat level

SOLID WASTE MANAGEMENT
